

QUADIVATOR ONE

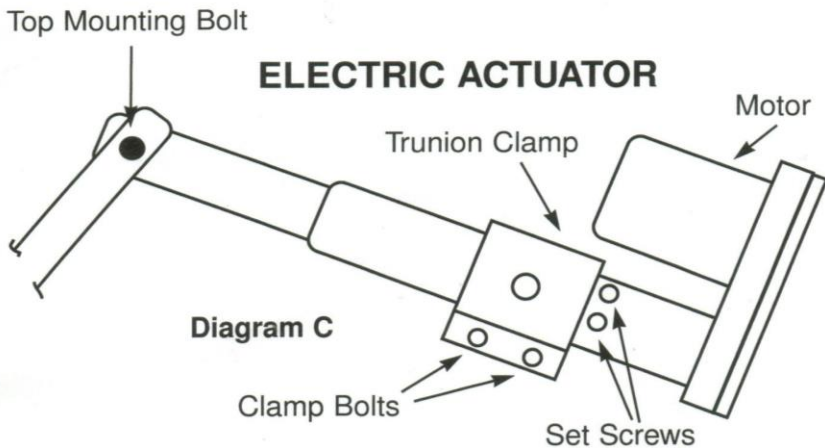

Assembly Instructions

- 1** Uncrate unit, fold harrows back, and install hitch tube, as shown in Diagrams A and B.
- 2** Feed power supply wires through the hitch tube, as shown in Diagram B.
- 3** Adjust hitch height to ensure Quadivator pulls level when in the ground or working position, as shown in Diagram B.

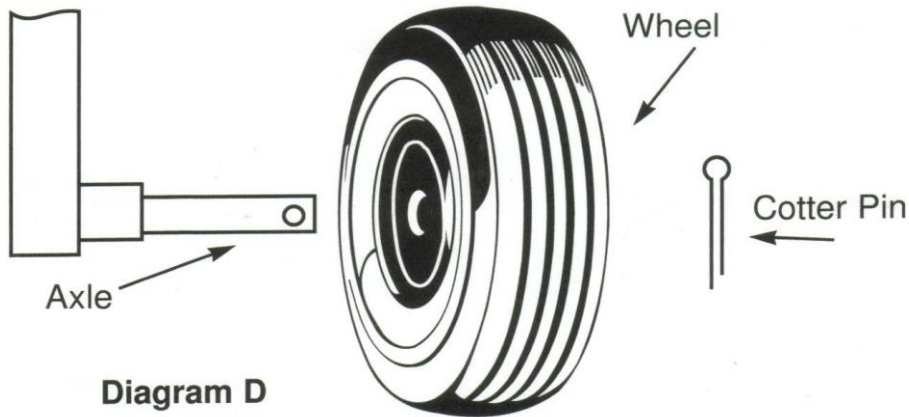

- 4** Rotate electric actuator 1/4 turn to position the drive motor in the up position, as shown in Diagram C.
- 5** Slide actuator in trunion clamp to position just above the set screws on the main hitch tube, as shown in Diagram C.
- 6** Tighten clamp bolts, install top mounting bolt, as shown in Diagram C.

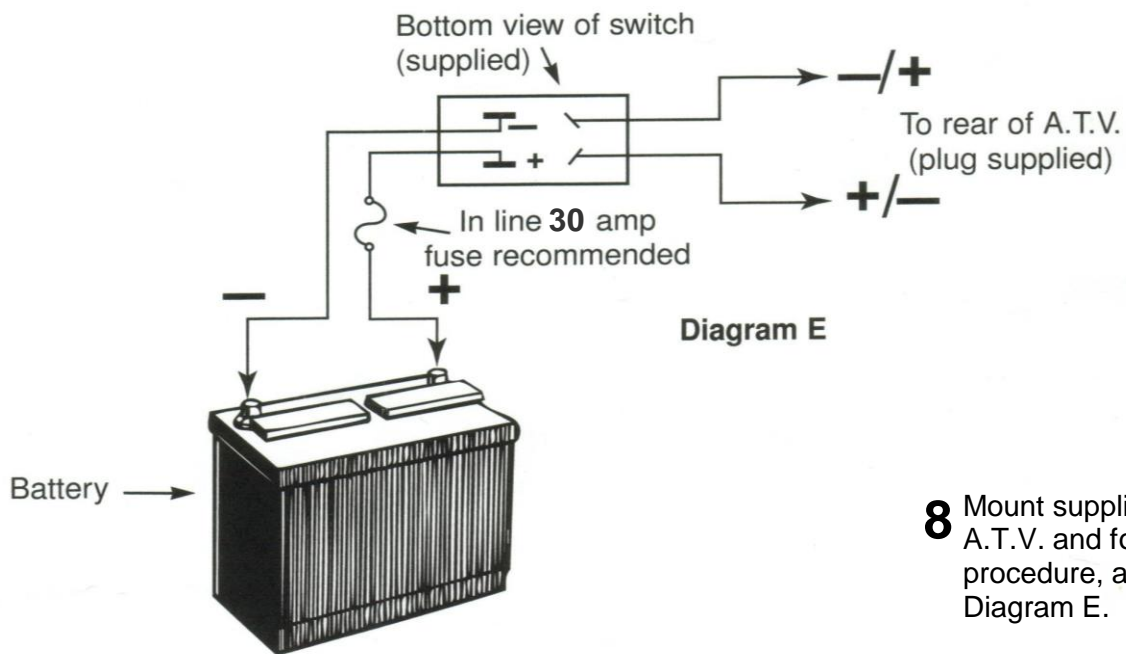

QUADIVATOR ONE

Assembly Instructions

7 Assemble wheels on Quadivator axles, as shown in Diagram D.

8 Mount supplied switch on A.T.V. and follow wiring procedure, as shown in Diagram E.
